About Miller Freeman Inc.

C/C++ Users Journal CD-ROM

The C/C++ Users Journal CD-ROM contains six years' of the leading C/C++ programming magazine.   Hundreds of articles, most with source code, provide practical technical information on debugging, algorithms, class libraries, image processing, portability, optimization, real-time and embedded systems, ANSI C and C++ standards -- and much more.

The CD's easy-to-use interface gives you powerful, full-text search capability.   Find the articles you need instantly.   It's all here: whether you began subscribing last month, last year, or at the beginning of the nineties, you'll have six years of C/C++ Users Journal at your command.

$49.95 (plus shipping/handling: $2.00 US/Canada; $10 all other countries)
Sales tax added in the following states: CA(8.5%), GA(6%), IL(6.25%), KS(6.9%), and NY(8.25%)

To order yours today Call 1-800-444-4881 (Int'l call 1-913-841-1631), or fax 1-913-841-2624, or send your request to MFI Product Fulfillment, 1601 W. 23rd St., Ste. 200, Lawrence, KS   66046 USA

Sys Admin

The Journal For UNIX Syst

Subscribe to Sys Admin and you will get solid technical information, 12 times a year, full of ways to improve the performance and extend the capabilities of your UNIX system.

No matter what hardware platform or version of UNIX you use,   you're covered with Sys Admin.   In fact, we cover UNIX in all it's forms --on System V, Sun, H/P, AIX, DEC, Solaris, SCO, Linux, HP-UX--and all compatible architectures.   Our writers will give you specific solutions to your particular problems.   And the answers are given in a format you can use.

You'll save time with the latest shortcuts and vital information about...

Web site management and maintenance
Reducing security risks
Better   backup and archives
Tracking and optimizing systems resources
Filesystem maintenance
Shell Resources

Boosting system performance
Increasing UNIX/NT/Windows/DOS Connectivity

To order just call 1-800-365-2210 (outside the U.S., 303-678-0439), fax 303-661-1885, email sasub@mfi.com, or write to Sys Admin, PO Box 59170, Boulder CO, 80322-9170.

Using the On-Line Guide

Accessing Help on Help

To access the standard help file for WinHelp, press F1.

Recognizing the Pieces

The Guide is composed of these components:

Help PopUps (Such as this one.)
The Product Directory (Press <u>here</u> to jump to it)
Product Pages (Press <u>here</u> to jump to one.)
The Main Welcome Page (Press <u>here</u> to jump to it.)
Miscellaneous Information Pages (Press <u>here</u> to jump to one.)

Interpreting Hot Spots

There are substantial differences among the product demos included on this CD. Some have free-standing demos; some must be installed on your system to run. Some are 16-bit apps that work with Win3.x, Win95 and Windows NT; some are 32 bit apps that won't work with Win3.x. We've tried to use consistent terminology in the hotspots to hint at these differences.

Install MS-Windows Demo
vs. Install Win95/NT Demo

When the hot-spot says MS-Windows, it probably runs under all versions of Windows. When it says Win95/NT, it is probably a 32-bit app.

Run Demo
vs. Install Demo

Whenever the hotspot says "Run" the demo was designed to run in freestanding mode from it's original distribution media (probably a floppy disk). Clicking a "Run" hotspot will not cause files to be copied to your hard-disk. "Install" hotspots will almost always invoke an install or setup program to copy files to your hard disk and make other changes to your windows installation. Be warned, only some demos supply uninstall options.

View Readme
vs. View Helpfile

We have included hotspots that directly invoke selected help files and other documents. Please remember that when you view these documents via a Guide hotspot, you are viewing it "out of context". Comments in the documents about how to install the demo, or about what should happen when you exit the document are not accurate; these files were created to describe how things should work when manipulating the vendor's original disk-based demo. In most cases, you can simply rely upon our "install" or "run" hotspot to activate the demo. In cases where that doesn't work, try the advice in the next section.

Solving "Can't find file" and Installation Problems

Not all "free-standing" demos will work correctly when run from the CD-ROM. Some products will appear to run, but report that they can't find certain files -- even though those files are clearly on the CD. This happens because the program is attempting to open the file with read and write permission. The CD is a Read Only media; it's files can not be opened with write permission. If you encounter this problem, copy the entire directory to some read/write media and execute the program from there.

A few products have special installation requirements. You may need to supply a program to unpak an archive, or the program may need to run from a floppy. Again, your best solution in these cases will be to copy the entire product directory to another media and perform the installation from there.

Finding the Product's Directory on Disk

While most products can be installed directly from the On-line Guide, some products must be installed "by hand". In these cases, you'll need to know where on the CD to look for the product's files. Each product is placed in a separate subdirectory within the root directory of the CD. This subdirectory is printed in the lower right-hand corner of the banner on the product's Product Page.

Returning to the Welcome Page

To return to the Welcome Page press the "Welcome" button on the button bar.

Browsing one Vendor's Products

Products from the same vendor are linked in a browse sequence. Whenever the browse forward/back buttons ("<<" and ">>") are activated you can jump immediately to other products from the same vendor simply by pushing the browse buttons.

Simple Multitasking Executive

Version 3.11

This directory contains demos for several products. These demos are designed to be run from a floppy (they need to reboot your machine). The first readme file explains how to build the floppy. The other files document specific products.

We have extracted the files in the various demos so that you can read some of the documentation without completing the installation. Please note that the demos *will not* start automatically (as the documents indicate) after you read these documents; you must build the floppy to have the demos run.

C/C++ Users Journal

Advanced Solutions for C/C++ Programmers

Windows® DEVELOPER'S JOURNAL

The Magazine for Windows Programmers

Welcome to the MFI *On-line Guide to Development Tools*, a joint project of Windows Developer's Journal and the C/C++ Users Journal.   We've assembled demos from dozens of vendors and constructed this on-line Guide to make it easy for you to find and evaluate products related to your work.

To get the most out of the on-line Guide, we suggest you read the "How to" topic below. The Guide should feel familiar,since it's built using WinHelp. You can go directly to a list of available demos by choosing the second hotspot below, or by pressing the "Contents" button.

>>How to use the on-line Guide.

>>Directory of Products. (The main table of contents)

>>How to subscribe to Windows Developers Journal.

>>How to subscribe to C/C++ Users Journal.

>>Information about other MFI products.

Memory Structures Library (MemSL)
For C and C++

Version 3.0

This package contains many small programs which demonstrate various capabilities of the library. See the directories \Windbase\memslc.3 and \windbase\memslcpp.3 for ready to run versions of these. To install on your hard disk, copy the self-extracting archive \windbase\windbase.exe to the directory of your choice and execute it. It will expand into a copy of the files on the CD.
