"READ ME FIRST"

– ABOUT THE DEMO

The demo application was used to create all the attached documents and written specifically to test the functionality and features of PAIGE.   This simple application represents only one of the many ways you can implement PAIGE into your application.

Some developers will only use a few of PAIGE's powerful features, while others stretch the technology far beyond what we thought possible.   The point is you pick and choose which features and what functionality you need, optimizing code size and overhead.

As a PAIGE owner you will receive the actual source code for this demo to use in your own application or to serve as an example to help get you started.

When reviewing the demo we encourage you to make comments, suggestions and/or ask questions.   Our engineers are here to assist you in evaluating PAIGE and have set aside time each day to respond to your questions.   We do ask that you submit your comments via email, Attn Customer Support at one of the following addresses

Internet...........................support@datapak.com
CompuServe..................76424,3027
America Online..............DATAPAK1
Web...............................http//www.datapak.com/~datapak

– Other Data

This demo containes several documents designed to give you all the information you might need to make an informed decision regarding licensing the PAIGE technology.

They are

• **Product Overview**
• **API (Functions)**
• **30 Day Evaluation Program**
• **Warranty/Licensing Info**
• **Object Code License Agreement**
• **Price & Ordering Info**

Also, there are other platform demos available for PAIGE contact DSI's Sales Department for more information.
