## FilePath => ClipBoard V1.0

FilePath => ClipBoard is a programmers utility/DA that allows you to obtain a files complete path name on the disk. This is very handy in many programming environments, including hypercard.

It is provided for you to use, almost free of charge. All I ask is if you use it, please make a small donation to the animal shelter in your area!

Todd Vernon (805) 253-3311 NASA x 5106

Thanks!
