

PowerEcho Registration

PowerEcho is not in the public domain Associates free. PowerEcho is required to add EchoMail capabilities to PowerBBS by Russel Frey. I'm asking a measly \$10.00 to register your copy. By registering your copy of PowerEcho, you will receive the next version free, and get fantastic discounts on future versions. Future versions will eliminate the need for PCGate, and eventually, ConfMail. You will also have access to unlimited support by calling my BBS. For \$10.00, it really is a good deal. So send me 10 portraits of good ol' George, and put your mind at ease.
