# Barcode fonts for Windows

**TrueType and PostScript type 1and 3 included.**

23>

5 123456 789017

**dLSoft Barcode fonts enable you to include printable barcodes on your documents, labels or reports. Just type in the characters needed to create the code and format the text in the required font.**

**In programmable applications barcodes may be created automatically from appropriate data fields.**

**Each font package contains TrueType, PostScript Type 1 and PostScript Type 3 fonts, and a helper program (dFont) which assists in the calculation of check digits for codes which need them.**

**The source code of dFont is included (Visual Basic) so that developers can copy sections of the code directly into their applications to automate their calculations.**

**Ideal for virtually all printing Windows applications (eg. Word for Windows, Excel, Access, FoxPro, etc.) and all versions of Windows from 3.1 up.**

### *Font packs available*

**Code 39 with Extended (Full ASCII) Code 39**
**Code 93 with Extended (Full ASCII) Code 93**
**Code 128 (including EAN128)**
**Code 11**
**Code B**
**Codabar**
**EAN/UPC**
**Interleaved 2 of 5**
**MSI/Plessey**
**Telepen (Full ASCII)**

*clocked codes*
**PostNet (including FIM)**
**Royal Mail (RM4SCC)**

**Details**

All codes (apart from clocked codes and EAN/UPC) are provided in three aspect ratios and three weights each, in TrueType, PostScript Type 1 and PostScript Type 3 format. The weights are nominal size, -8% and -16%.; the latter may be used to compensate for ink-spread in wet-ink printing. EAN/UPC is supplied in two aspect ratios (nominal and 80% height). Where relevant fonts are provided with and without text under bars.

### *System requirements*

Requires Microsoft Windows 3.1 or later. Suitable for Windows 95 and NT. To obtain printed barcodes a Windows compatible graphics printer is required.

## *If you can type *DLSOFT* you can type*

* D L S O F T *

or

D L S O F T
