Star Graphics produces fun and challenging games for Windows the whole family will enjoy. These are games you'll keep coming back to play again and again.

FigurePic - Blends logic and art into a unique and addicting puzzle game. The numbers at the top and side of a grid define how many squares are darkened in the grid and in what order. When you are done you will have (hopefully) painted a picture. There must be at least one blank square between groups of the same color and there may be one or more blanks at the ends. *FigurePic* with 30 assorted puzzles is \$29.99. Some of the puzzles are multi-colored. Windows 3.1.

Spiderette - A cool solitaire game where there are no separate foundations on which to build the four completed suits. Move cards from pile to pile to get them in decreasing sequence. One can move a whole stack of cards if it is in the same suit and also in sequence. It's difficult to win but don't give up. Has a casino option but don't plan on getting rich. Windows 3.0 or higher. Price: \$12.99

Q - A graphical puzzle game - your task is to find the hidden ships and disable them. Fire probes and observe how they interact with the shields of the ships. Use this information to map their location and then bomb 'em. See how many ships you can find. Windows 3.0 or higher. Price: \$19.99

TAZ - A Windows 3.1 game in which there are falling triangles that one tries to fit together to form shapes of the same color. There is a different shape for each of 14 difficulty levels and one has to deal with new combinations of colored triangles at each new level. For an easier game try turning the shape mode off. Windows 3.1 Price \$29.99

Morris - A board game of ancient origins. It is somewhat like an elaborate tic-tac-toe. The object is to form rows of three pieces while blocking your opponent. Play against the computer or against a friend. Choose between 9 or 12 pieces with or without diagonals. Windows 3.0 or higher. Price: \$15.99

Stifle - A cute little board game. To win you must isolate or surround your opponent so she can't move. If a piece is next to one piece it moves one space, three other pieces means a three space move, if there is room, etc. Play against a friend or the computer. Multiple difficulty levels. Windows 3.0 or higher. Price: \$19.99

Patterns - More difficult than it looks, with this set of classic puzzles you build specific shapes using all the pieces. Keeps track of the puzzles you have solved. There are two libraries of shapes to complete: *Tangrams* and *Plates of Wisdom*. See if you can complete them all. Windows 3.1 Price: \$15.99

Ambush - Ambush is an ancient board game somewhat reminiscent of chess. At one time it was very popular but it is little known today. In the literature on board games it is called *Rithmomachia*. There are 3 basic pieces : rounds, which move 1 space at a time, triangles that move 3 spaces, and the squares move 4 spaces. There is also a pyramid which is composed of the other piece types and can move like any of them. Each Piece is assigned a numerical value and movement is any direction. Captures are accomplished by various spatial and numerical combinations. Price: 19.99.
