## Overview

KENO for Windows is a gambling game in which the player begins with $\$ 500$. Pick from 1 to 12 numbers between 1 and 80 , then bet $\$ 1$ to $\$ 5$. When the Play button is pressed, twenty winning numbers will be drawn at random. If enough player's picks match winning numbers, the bankroll will be increased by the payout amount according to defined odds. To get information on a specific function or area, click on it in the graphic below.

## Playing the Game

Pick 1 to 12 numbers between 1 and 80 by pressing the desired buttons on the playcard. Player's picks are highlighted in red. To unselect a pick, simply press the desired button on the playcard. (Select Clear Playcard from the Game menu to erase all picks.)

Place a bet from $\$ 1$ to $\$ 5$ (default bet is $\$ 5$ ).

Twenty winning numbers will be drawn randomly and highlighted in blue on the playcard. Any time a player's pick matches a winning number, a hit is marked in yellow. If enough winning numbers result in hits, the bankroll will be increased by the payout amount according to defined odds.

Continue to press the Play button or press the [Enter] key to continue playing the same picks.

## Play Command

After selecting picks and placing desired bet, press the Play Twenty winning numbers will be drawn at random and highlighted in blue on the playcard. Any winning numbers that matched a player's pick will be marked as a hit.

## Bet Command

Press the Bet button to display the Bet window. Bet $\$ 1$ to $\$ 5$ by pressing the desired button. The default bet is $\$ 5$.
