<u>How to Play</u>

To start Poker Solitaire or *Pokersol*, just select "Start a New Game" from the "Games" menu or click on the card deck in the upper left corner of the game window. This will shuffle the card deck and show you the first card you can play.

You move the cards by clicking the mouse on the spot where you want the card to go.

You play Poker Solitaire by building ten Poker hands -- five across and five down --to achieve the highest possible scores.
