TIME TRAX 1.01

"*A modem tool without equal*"

Brought to you by Digital Interface Software

Overview...

Ever wonder how long that file will take to upload or download? But you don't want to have to turn on your terminal and fake a upload to figure it out, or find a calculator and do it the old-fashioned way? Wouldn't it be great if you could click on a file and automatically know how much time it will take?

Wait no longer. **Time TRAXX** is here and your file transferring just got a bit easier. Just select a file, click on a baud rate and your problem is solved. It's that simple. No hassles, no mess, and it comes with a nice interface.

Remember IBM doesn't stand for "It's Better Manually"

Inventory...

This zip is *safety sealed for your protection,* nevertheless check to make sure the following files are the only ones you have:

TRAXX101.EXE	This is the main program (in all its splendor)
TRAXX.WRI	The literary artwork you are reading
VBRUN200.DLL	Microsoft™ Visual Basic Run-Time library
THREED.VBX	Yet another Microsoft™ Library

That's it.... If tampered with please contact your local **Digital Interface Software Authorities..** If discontinuity of files persists or rash develops discontinue and consult someone. But seriously make sure only these files are the one's contained in TRAX101.zip.

Using Time TRAXX...

1.   Make sure you have vbrun200.dll & threed.vbx in your c:\windows\system directory.
        If you don't have this file don't fret, it's in the zip file.

2.   Unzip the other files into whatever directory suits you. c:\traxx for example.

3.   Run it and hope for the best.

Future Versions...

-       DDE Implementation: Well first I gotta figure how that stuff works first.
-       OLE Implementation: Let's leave that one to Microsoft.
-       Voice Commands: Buy Voice Blaster and have fun.
-       Calibration to your individual modem.. (This is possible seriously, if people want it)
-       Interface enhancements
-       Customizable baud rates

How to reach the authors...

Digital Interface Software Headquaters can be reached for questions and suggestions at the following locations.

internet...
jeffc@eng.fiu.edu
rojasa@solix.fiu.edu

or for modem users...
(305) 238-9423

Contributions...

Time TRAXX is Tuition-ware. Pay for a starving student's college education.
Send $5 bucks US (**cash or check**) or whatever you'd like to contribute (no lint please...) to:

Jeffrey A. Cubillos
3508 SW 113 Court
Miami, FL 33165

Check payable to either:
Jeffrey Cubillos or Alfredo Rojas

Voice Mailbox:
(305) 957-9767

All contributors get the latest revision of Time TRAXX and information on other **DI Software** products.

Enjoy... If you can't contribute at least drop us a line via email or snail mail to let us know what you think, input is important.
