

NetMinder for Windows demonstration version.

Release Notes:

Installing NetMinder:

UnZip the archive (netdemo.zip) to a floppy and install from drive a: or b:. NetMinder will not install properly from a Hard Drive. Make sure you have share.exe installed in your autoexec.bat file. NetMinder needs share.exe installed to operate properly.

Starting NetMinder:

After the initial setup has been successfully completed, double click on the NetMinder icon to start the program running. When the NetMinder window comes up, select open from the file menu and load the demo.dbf demonstration database file.

Demonstration version limitations:

The demonstration version of NetMinder is limited to one database with 12 entries. The full version of NetMinder will allow the user to create an unlimited number of databases, each with thousands of entries.

Purchasing NetMinder:

If you can not find NetMinder at your local University Bookstore or other reseller, it is available for \$45.00 (\$39.95 + UPS) directly from CPProgram Software Inc.

Address:
CPProgram Software Inc.
Box 1147
108 - 4800 Kingsway
Burnaby BC
