

OVERVIEW

This is the first line of the overview topic in the help demo database.
The previous line did not have any link, while this one does.

Press the Enter key to view the link topic help page.

This is the 2nd screen

Welcome to the link help page, since this is a demo help database, we know that you arrived to this page from the [overview](#) page, by pressing the link hot-link. In this page we will demonstrate the ability to include 2 different names (or more) that will take us to the same link.

Example :

[General](#)

TOPIC

Well.. it seems as if you succeeded to reach this point by yourself, this is the 3rd page of the HELPDEMO help database. From this help page you can go to the [previous](#) help page, or to the [entry](#) help page.

Have fun using the help compiler and help engine ..

Notice - this line demonstrates the use of a ~ in a text page.
(Please refer to the HELPDEMO.HDF file an example ..)

There are more pages you can get to from here - One of these links is defined in a [.INCLUDE](#) file. Please refer to the helpC documentation for HDF syntax. Notice how you get a [Popup](#) here!.

INCLUDE

This link was defined in a separate help definition file (HDF), and was included in this data-base using the .INCLUDE command of the HDF syntax.
