

Double-click

Mr.Cassette 1.0Cassette Case Label Makerby GMarr Productions 1993Description: Cassette Case label maker macro for Winword 2.x. A quick and easy way to make labels without having to worry about formatting and such.

Instructions: Just arrow down to the box and double click in it. Once you are done entering the cassette info you'll be asked if you are ready to print. Once printed, cut out your label and you'll be ready to use it on your cassette.Helpful Hints:1. You need to type the name and artist only on side A (sometimes you can have one artist and two different CD's ,etc.)2. Due to size limitations only 17 songs per each side are possible. (this is release 1.0... Future releases may solve this problem.)3. The fonts automatically size to fit but you are limited to 40 characters per line. 4. If you 'Cancel Out' before the macro ends, you will end up with an error and an unfinished cassette label. Don't worry - No harm done. Just start over.5. You might want to setup your printer for the correct output(draft or LQ) before running the macro.Nagging Note: If you like this macro and would like to see other macro enhancements to Winword 2.x, donations with suggestions would be very appreciated. For donations of \$5.00 or more, I'll send you an installable version of this macro so you can install it on your toolbar or menu and you won't have to be subjected to this DOC File ever again!
