<center>
Welcome to WordBook V1.6!
Unregistered Evaluation Copy§
</center>

   WordBook V1.6 is an Address/Phone Book Manager designed to run with Word for Windows 2.x under Windows 3.1. Please be sure you have the correct software before attempting to install or run this macro! (Compatibility with previous versions is possible, but is **not** presumed nor guaranteed!)

   Double-click the following button to 'test-drive' the WordBook program without installing into your own templates:

<center>

Run

</center>

   Or, once you've made your decision to install WordBook V1.6, double-click on the following button. (WordBook will then be available on your Tools Menu and as Ctrl-Shift-A!

<center>

Install

</center>

   Thank you for trying WordBook V1.6, and **please don't forget to register** your copy! Registration is inexpensive and easy and will 1-**Eliminate the reminder screen** on startup, 2-**Give you multiple 'books'** for storing addresses such as friends, office, relatives, etc., 3-allow you to **sort your books** of addresses, and 4-allow you to **run WordBook on up to 10 machines** that you own! To register, send your name, address and a $10 registration fee, to the following address: (If you choose not to register, please take the time to write and tell me why and what changes you would like to see to the program that would help you to decide to register... Thanks!)
