

Dear Sysop:

In order for this game to work as a door on your system, you need a program that will allow your users to play it (it is not yet written specifically for Bulletin Boards - it was originally written for play by a single user - but has evolved into a door game by popular demand).

Many BBS's have had success using DOORWAY.  
There are probably other programs out there that will do the job also.

If you have any questions or need help installing the program onto your board, mail me  
at my internet address..... [anthony.dunleavy@compudata.com](mailto:anthony.dunleavy@compudata.com)

or

Call one of the following BBS's direct and leave a note for the sysop

Iron towers 609-468-1374

Sinister BBS 609-547-9402

we are currently (at the time this doc is being written) working on a version that will specifically be designed for BBS's - which should be out within weeks (of this message).

Thanks for your support!

Anything else I can do for you, please let me know.
