What Is RuPuzz?

RuPuzz is a combination of **Rubik** and **Puzzle** game. The object of this game is to rearrange the cells on north, east, center, west, south, and back sides (the back side is the side at the upper left) so that the cells on each side match a certain pattern. There are three different patterns, that is “Same Color”, “Plus”, and “Rectangle”. The default pattern is “Same Color”, it means that you must rearrange all cells so that the cells on each side are the same color.

Although all sides in RuPuzz is shown in two dimensions, there are still relationships between them (just like the three dimension (3D) of Rubik game). For example, moving the first column of the center side will alter the cells on the west side (not just the north, south, and back sides).

However, if you find that it is too difficult to solve, you can try to play with Beginner or Intermediate level. In this two levels, there are no relationships between the sides. For example, moving the first column of the center side will only alter the cells on the north and south sides.

You can also change the number of cells on each side from 2 x 2 cells up to 5 x 5 cells. However, in the unregistered version, you can only play with 3 x 3 cells.

Playing the Game

The object of RuPuzz is to arrange the cells on each side so that they are match a certain pattern.

To start a new game

From the Game menu, choose Scramble or press F2.

To move a row or column
