

The on-screen browsing utility called BROWSER 2.0™ has been designed as a tool to guide you through PhotoDisc's library of images. You may browse the Sampler 96.1 by a number of different criteria listed below.

1

browsing

- 1 Insert the Sampler disc into your CD-ROM drive and launch FILE MANAGER.
- 2 Within FILE MANAGER, access your CD-ROM drive, usually your D: drive.
- 3 Double click on the BROWSER2 folder.
- 4 Double click on the BROWSER.EXE file and Browser 2.0™ will automatically load.
- 5 Search through the VOLUME, SIGNATURE, FINE ART, OBJECT, or HI RES catalogs
- 6 Use the scroll bar found on the right side to view the Sampler images.

or keyword searching

- 1 Narrow your search by selecting KEYWORD in the upper left corner of the menu bar and type descriptive words to locate associated images.

or finding by file name

- 1 Use FILE NAME to locate specific files by typing its exact file name and extension.
Example 1: Volume 01, image #001 = 01001.TIF
Example 2: Signature Series 06, image #025 = SS06025.TIF
Example 3: Object Series 09, image #050 = OS09050.TIF
Example 4: Fine Art Series 04, image #100 = FA04100.TIF

2

after perusing the images

- 1 Open your graphic design or page layout application.
- 2 Locate the desired HI RES image from the disc and import the image from the PHOTOS folder. (Sampler 96.1 contains 10 HI RES images only. LO RES images are found on PhotoDisc's Resource Book discs.).

Windows users who have Adobe Photoshop™ or similar products will be able to open the Resource Book images. If you do not have access to a graphic design or page layout application that has the ability to decompress the JPEG images, use VIEWER.EXE.

3

viewer.exe

- 1 Insert the Sampler disc into your CD-ROM drive and launch FILE MANAGER.
- 2 Within FILE MANAGER access your CD-ROM drive, usually your D: drive.
- 3 Double click on the BROWSER2 folder.
- 4 Double click on the VIEWER.EXE file.
- 5 Under LIST FILES OF TYPE select ALL FORMATS.
- 6 Within the directories box, select your CD-ROM drive and go to the PHOTOS directory.
- 7 Within the PHOTOS folder choose HI RES.
- 8 To the left, select the file name you wish to open and click OK. The file will now decompress.
- 9 In the VIEWER window select FILE, SAVE AS... change the format to TIFF and select a destination on your hard drive. In the FILE NAME box, name your file with the .TIF extension and click OK.
- 10 Close out of your newly saved image, open your graphic design or page layout application, locate the desired image from your hard drive and import the image into your application.
