Ordering Information

SuperClock *v1.0*

Using SuperClock:

Using SuperClock is simple. Simply click on the clock with the left mouse button to activate the menu.

You can set, display, edit, and cancel alarms from the menu.

You may also set SuperClock's configuration to customize the sounds that are played for the Hourly Chime, Alarms, and Alarm Reminders. In addition to the sounds supplied with SuperClock you may choose any Windows *.wav file.

Selecting 'Always on Top' keeps SuperClock on top of all other   applications,   Check this option if you want SuperClock to always be visible. Otherwise SuperClock behaves like a normal icon and is hidden by active windows that are on top of it.

SuperClock displays the current date in the icon title bar, if you want to change the display to the current time, click on the   SuperClock icon with the right mouse button.

SuperClock *v1.0*

Options:

Hourly Chime

Alarm Sound

Alarm Reminder

Snooze Time

Remind Time

 button

Use the File box to select
the sound you want to hear when
the clock chimes on the hour.
Choose <none> to disable the chime.

Use the File box to select
the sound you want to hear when
an alarm first becomes active.
Choose <none> to disable alarm sounds.

Select a period in minutes that you want an active alarm to stop beeping. After this time has expired the alarm will return to an active status.

Use the File box to select the sound you want to hear periodically while an alarm is active. Choose <none> for the alarm to be silent.

Related Topic: **Remind Time**

Select an interval in minutes at which an active alarm will sound a reminder   beep. The alarm will use the sound selected as   the Alarm Reminder.

Use this button to hear the sounds you
have chosen before saving them.
Select a sound from the Event   box
and then press the Test button.

SuperClock v1.0

Setting Alarms:

Alarm Time

Alarm Date

Frequency

Alarm Reminder

 button

Enter the time at which you   want the alarm to activate in a 12 hour format. Use the AM/PM buttons to select the appropriate alarm time.

Enter the date for the alarm, using the list box for the month and entering the day and year. The date must not   have passed.

Use the radio buttons to have an alarm reoccur at the selected interval. Selecting Once is a one time alarm. Use the Custom selection to specify an interval between 2 and 364 days. Enter the custom interval in the edit box.

Enter the text that you want to display in the alarm window.   The date and time are automatically inserted. The text is formatted to 40 columns and is limited to 1000 characters.

Press this button to change the color of the alarm window. You may select any of the displayed colors or define a custom color. Be careful not to use so dark a color that black text will not show clearly . The default color is pale yellow ▬.

Modifying Alarms:

Alarm List box

 button

 button

Use the list box to select an alarm that you want to change. Click on an alarm with the left mouse button or scroll to it using the arrow keys. After selecting an alarm to change use the buttons to either delete or edit the alarm.

Press this button to change the settings you have entered for the highlighted alarm. You will be presented with an Edit Alarms window that is identical to the Set Alarm window in function.

See: **<u>Setting Alarms</u>**

Press this button to delete the highlighted alarm. Once deleted, all information regarding this alarm is lost.

SuperClock *v1.0*

Using Alarms:

 Active alarms

 Acknowledging

 Snoozing Alarms

 Viewed Alarms

When an alarm is active it will stay on top of all other windows. The alarm will also beep at the interval specified by the <u>remind time</u>, using the sound selected as the <u>alarm reminder</u>.

To acknowledge an alarm, click on it once with the left mouse button. After being acknowledged, the alarm will discontinue beeping and will hide behind other windows. This option allows you to quickly silence an alarm without having to view its contents.

To snooze an alarm, click on it with the right mouse button. A snoozed alarm will discontinue beeping and hide behind other windows for the duration of   the snooze time. After the snooze time has expired, the alarm will become active once again. To reset the snooze time before it has expired, simply click on the alarm with the right mouse button again.

To view the alarm window and any reminder that you have entered, double -click on the alarm using the left mouse button. You may save this alarm on the screen by minimizing it. This allows you to save the contents of the alarm for future reference.

SuperClock v1.0

SuperClock is NOT free or public domain, but is being distributed as "shareware."
