1.5 (16/07/98)   New title bar with the 2 buttons (nobody seems to know that panels can be collapsed)
Double click or INS to send the selected wav directly to the selected channel in FruityLoops.
Defineable filters for those who asked (how stupid).

1.4 (12/05/98)   Threw CD player (no one used it - it was shit)
Added trash bin
Added things
Removed things

to do: Close DSound when loosing focus
Play MIDI files through DirectMIDI (when DirectMIDI is out)

bugs: For some reasons the directory list color won't update till the prog is reloaded.
