

ILLINOIS TERMINAL RAILROAD
SPOTTER'S GUIDE

Volume One: The Diesels

Illinois Traction Society

by Dale Jenkins, Mark Barnett and James Reese
Brueggjenhann/Reese, Inc.

Acknowledgements

In May of 2000 in Carlinville, Illinois the idea of a series of Illinois Terminal "Spotter's Guides" was conceived. The plan was to begin the series with a complete history of dieselization on the Illinois Terminal Railroad. This would include the planning, demonstrations by various locomotive companies and the operations of diesels. Further, it would document the unique and varied paint schemes carried by each locomotive, statistical data and finally disposition of the locomotives. It was also part of the early planning to include a full color CD so that modelers and historians could view the greens and yellow in all their variations. To this has been added the detailed drawings of Terry Black which are included both in the printed book and on the CD.

This project would not have been possible without the energetic assistance of many individuals; among them Dale Jenkins, Mark Barnett, Mike Fortney, Terry Black, John Sanner, and the entire board of directors of the Illinois Traction Society.

My sincere thanks go to all the photographers including John Howard, John Stubblefield, Richard Wallin, Jim Yasinski, Allen Dickson, Art Purchase, Michael Wise, Garland McKee, Gene Carpenter, Howard Gayner, Donna Trebing Weber, Larry Thomas, William Raia and Mike Schafer for their generosity.
