

Lab 8: Vector Functions in Space

Lab8.ma is a *Mathematica* notebook that extends the work of Lab 3 to curves in three-dimensional space. It shows how to obtain the velocity vector, the acceleration vector, the speed, and the arc length of the trajectory in space.

Like all *Mathematica* notebooks, this one is used by opening its cells and executing its *Mathematica* commands. To open a cell, double-click on its cell bracket. To execute a *Mathematica* command, click on its cell bracket to select it, and then press the Enter key (not the Return key).

Lab8.wn explains how to work through **Lab8.ma** on the NeXT.
