

## **NeXTStep 3.3 for Intel Patches**

The patches in this directory have been produced by NeXT, and are redistributed here with their permission. They are in no way associated with Insignia Solutions other than that they have been installed, and observed to be beneficial to users of SoftPC.

The interceptor patch on this CD is considered by NeXT to be of Beta quality.

These patches were current at the time that SoftPC4.1 was produced (October 1995). However, additional patches may have been released by NeXT. The latest patches may be obtained from NeXTAnswers (<http://www.NeXT.com/NeXTanswers/>).
