

Introduction

The function of this program is to create **hotspots** which will allow the user to turn his screensaver on and off simply by placing the cursor in a predefined corner. There are two executable files that are included in the program, "HOTSPOT.EXE" and "HSSETUP.EXE".

HotSpot Functions

Run the **CT HotSpot Setup** program to define your preferred hotspots first. Then put the **CT HotSpot** program in your StartUp group, restart *Windows*, and you're in business! You will see a little flag pop up when your screensaver is disabled, letting you know that **CT HotSpot** is doing what it's supposed to be doing. As long as the cursor is parked in the appropriate corner, your screensaver **cannot** come on. Simply moving the mouse will restore your screensaver settings. Of course, **CT HotSpot** will also set up a corner to start your screensaver, which can be pretty handy if you want to impress your friends with your latest screensaver "find". If you wish to turn the program off, click on the *Saver is off* flag when it is showing and then hit **ENTER** on your keyboard.

Registration

CT Software
759 Galleon Lane - Elk Grove, IL 60007
USA
1-800-617-7740

If you wish to register the program, we do accept **VISA** and **MASTER CARD**. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **\$10.00**. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.
