A word about user supported software:

The user supported software concept (usually referred to as shareware) is an attempt to provide software at low cost. The cost of offering a new product by conventional means is staggering, and hence dissuades many independent authors and small companies from developing and promoting their ideas. User supported software is an attempt to develop a new marketing channel, where products can be introduced at low cost.

If user supported software works, then everyone will benefit. The user will benefit by receiving quality products at low cost, and by being able to "test drive" software thoroughly before purchasing it. The author benefits by being able to enter the commercial software arena without first needing large sources of venture capital.

But it can only work with your support. We're not just talking about BREEZE here, but about all user supported software. If you find that you are still using a program after a couple of weeks, then pretty obviously it is worth something to you, and you should send in a contribution.

Other programs by the same author:

POWER WORDS: 5000 quotes at your fingertips - fast!

CONTROL3: File manager, lists three drives/directories on screen.

LIFEGAME: Graphical simulation of natural systems.

And six computer books:

POISON FOR THE HEART: The ultimate philosophy.

Written in an aphoristic style for those who don't like to waste their time with padding. Discusses the law of cause and effect and its far reaching ramifications. Investigates the nature of the ego, attachment, religion, men and women. Arguably the only book a thinking person needs to read.

THE LOVE BASE: for the idealistic spirit

"The love base" contains over TWO HUNDRED AND FIFTY of the very best love poems to bring fire to even the coldest of hearts, and to awaken the idealist within your soul. Learn of love's beauty, fantastic love, erotic love, the contradictions of love, love's lies, and the humour of love.

VENOM CRYSTALS:

A compilation of the most powerful spiritual/philosophical writings of all time. Includes the best from Buddhism, Christianity, Taoism, Kierkegaard, and Nietzsche.

LETTERS BETWEEN ENEMIES:

Amazing correspondence between two thinkers. Written in a very personal style, these writings describe the life experiences and the struggles of two genuine thinkers in their struggles to live a philosophic life.

WOMAN:

This is the bravest compilation of writings about women there has ever been. To say these writings are dangerous would be an understatement. For the first time, read the naked truth about women, and learn all it is unwise to know about them. You are presented with a selection of astounding quotes about women, along with exceptional writings from Kierkegaard, Nietzsche, Schopenhauer, and Freud. There are also memorable writings from the Buddhist and Hindu philosophers.

EVIL WISDOM:

"Evil Wisdom" is a compilation of the very finest gems of deadly Eastern wisdom. Includes the Bhagavad Gita, the Dhammapada, the Heart Sutra, and the Tao Te Ching, as well writings of Meister Eckhart and the magnificent Gospel of Thomas.
