Class sun.tools.debug.BreakpointQueue

```
java.lang.Object
   |
   +----sun.tools.debug.BreakpointQueue
```

---

public class **BreakpointQueue**
extends Object

Variable Index

o **catch_pc**
o **exception**
o **nextQ**
o **opcode**
o **pc**
o **the_bkptQ**
o **thread**

Constructor Index

o **BreakpointQueue**()

Method Index

o **nextEvent**()
o **reset**()

Variables

o **the_bkptQ**

```
public static BreakpointQueue the_bkptQ
```

o **pc**

```
public int pc
```

o **thread**

```
public Thread thread
```

o **opcode**

```
public int opcode
```

o **nextQ**

```
public BreakpointQueue nextQ
```

o **exception**

```
public Throwable exception
```

o **catch_pc**

```
public int catch_pc
```

Constructors

o **BreakpointQueue**

```
public BreakpointQueue()
```

Methods

o **nextEvent**

```
public synchronized boolean nextEvent()
```

o **reset**

```
public synchronized void reset()
```
