* Retrieving- THE PROFESSIONAL REAL ESTATE ANALYST ver. 3
        >>> THIS FILE FOR HARD DISK USERS ONLY <<<
Your LOTUS disk is set up to retrieve files from wherever you currently
store worksheet files. This file will temporarily change the LOTUS
directory to the ANALYST subdirectory, saving you the steps of changing
directories, and will retrieve the Introductory File (named AUTO123.WKS).

Copy this worksheet file to your normal LOTUS subdirectory for saved
.wks files (archive the original ANLAYST disk).

The file assumes that your LOTUS system disk is stored in a subdirectory
named LOTUS. If this is not the case select MODIFY from the menu. At
the cursor location type in your subdirectory name for your LOTUS
program. If you make an error use the RESTORE MACRO menu selection.

Once below macro is correct AUTOMATE the file (saves ANALYST.WKS).
Retrieval of the ANALYST file will now bring up the proper files.

DO NOT MAKE THESE CHANGES TO ORIGINAL ANALYST.WKS FILE! Store it.
{home}~/wgdd{esc}c:\lotus\ANALYST~q/frAUTO123~

/xg\z~

MODIFY
Insert the proper name for your LOTUS subdirectory.
{goto}macro~{edit}
