

P-Caps
Installation Macro v.2.0
Step 2

Follow these steps to complete the P-Caps installation. You may print this information like any WordPerfect document.

Modify DEFAULT.WPM

1. CTRL+F10 (Define Macro), type "DEFAULT" then press ENTER.
2. If you don't see **DEFAULT.WPM Already Exists: 1 Replace; 2 Edit; 3 Description** either re-run the INSTALL.WPM macro or consult the MANUAL.DOC for installation help.
3. If you do see the message in number 2 above press **2 Edit**.
4. If necessary, change the directory on the second line to the location of the P-Caps graphic files. Note that the directory name **MUST** end with a \ and the whole line must end with a ~ (i.e., C:\WP51\P-CAPS\~).
5. If you need to change the default size for P-Cap creation you can do so on line 3.
6. If you would like to be prompted for a size when you create a P-Cap, change the statement on line 4 to: **{ASSIGN}ask_points~y~**
5. Press F7 (Exit)

At this point, ALT+P activates the P-Caps keyboard layout, ALT+N activates the Normal layout (see the MANUAL.DOC for directions on setting up a different "normal" keyboard layout).

INSTALLATION COMPLETE!!

I hope you enjoy using P-Caps and would very much appreciate your comments and/or suggestions:
