

Sfware Special Effects

Every special effect font on this page was created with Sfware. Sfware is a collection of softfont utilities from Small Planet Software. The original font (this plain, upright one) is the only font that was not created by Sfware. All of the effects on this page are modifications of the original font performed by Sfware.

In addition to providing special effects Sfware includes utilities to download, compress, rotate, preview and print summary pages of font information.

If you have softfonts, *you need* Sfware. You never know when you might want a taller or wider font, or some shading, striping, or drop-shadow, three dimensional effects. **Tilted Too!**

This page demonstrates only a few of the special effect possibilities that Sfware can produce. Every effect can be tailored to your wants and needs, your imagination is the only limit...
