NAME: \_\_\_\_\_

ADDRESS: \_\_\_\_\_

CITY: \_\_\_\_\_ STATE: \_\_\_\_\_ ZIP: \_\_\_\_\_

## Installation

I'll describe the installation process in three steps:

- 1: Create the subdirectory and copy files
- 2: Installing "Sky" in the windows 3.0 Program Manager
- 3: Configuring "Sky" for your location

First, copy all files from the distribution disk into a directory called "SKY". To do this from DOS type:

```
CD \
```

```
MD SKY<ENTER>
```

```
CD SKY<ENTER>
```

```
COPY A:*. *<ENTER> (If you have more than one disk, insert each one and repeat this command)
```

If you downloaded this from a BBS then from DOS type:

```
CD \
```

```
MD SKY<ENTER>
```

```
CD SKY<ENTER>
```

```
PKUNZIP source-path \SKYW10R.ZIP<ENTER>
```

Next, from window's "Program Manager", select **F**ile then **N**ew. In the Filename Box type:

```
\SKY\SKY.EXE
```

Then press **O**k.

Finally, select the icon for "SKY" and run it. Once "SKY" is running select **L**ocal then **L**ocation and scan through the list box for a city near your location (if you can't find one you'll have to find your location on a map and enter it into the Latitude, Longitude, and Time Zone boxes.) Once these are set select Display then **S**ave **D**efaults. "Sky" is installed.
