**Player**

**Source Code**
Artic Software Company is making the complete Visual Basic source code for Song Player available for $12.   This includes all VB forms and VB code.

The "3-D look" aspect of Song Player is done with custom controls from Sheridan Software Systems
Sheridan Software Systems.   Only run-time versions of these controls are included, but both code using & not using these controls is included for the $12.

Artic Software Co. can accept Checks, VISA or Master Card.   For credit card order please include the number, experation date and complete name from the card.

Send   Payment , Name, Address and diskette size to:

**Waterford, WI   53185-0028**
**(414) 534-4309**

**File**
The file menu contains two commands

**Open Song File**
This command opens Standard MIDI Song Files for accompaniment (See Player for more information.)

**Exit**
This command exit from Song Player to the Windows Program Manager.

**Nkey**
  Nkey is a  Music Performance Program for Windows.    Jam the Blues, perform Jazz & even solo rock 'n' roll while **never** playing a **WRONG Note**.   Nkey allows anyone to perform phenomenal instrumental music directly from your PC's keyboard.   That's right, using the same keyboard that "normal" users use for word processing and spreadsheets, you can improvise like a pro.   Call our 24-hour demo line and hear for yourself.   (414) 534-4309

  Nkey's automatic scale and key selection turns your PC's keyboard into a powerful improvising tool.   Nkey includes a graphic piano display, real-time graphic mixer, midi file player, 39+ standard midi files, online help, printed manual.

  All you need is a Sound Card or Midi Interface and Windows 3.0 or higher.   You don't even need the Multimedia Extensions or Windows 3.1.   Nkey is $39 from Artic Software.

Artic Software Co. can accept Checks, VISA or Master Card.   For credit card order please include the number, experation date and complete name from the card.

**Player**

Song Player includes controls for playing standard MIDI song files.

**Tempo**
This slider control allows you to control the tempo of the song file being played. The tempo is loaded with each Song File

**File Path**
This shows the path to the current song file.

**Play**
This button plays the song file from the current Bar count.

**Stop**
This stops the song file at the current Bar count.

**Rewind**
This rewinds the song file to it's beginning.

**Bar Counter**
This shows the current Bar the song file is on.
