Installation

All WinTools programs are intended to be installed in a directory named WINTOOLS, but all
but WinQuote on the Bonus Disk will work from any directory you so choose.

An Install Batch file is included with the WinTools package that performs a basic install
from the floppy to a directory named WINTOOLS on your C: drive. Be sure to read the Batch
file information during the install.

WinTools is very easy to install, if you prefer to perform the install manually, simply
follow these few steps:

1. Create a directory on your C: Drive. The default is WINTOOLS.

```
        md c:\wintools
```

2. Copy all WinTools EXE programs to this directory. You may also copy the WinTools
documentation and Readme file to this directory.

```
        copy a:*.EXE c:\wintools    or    copy b:*.EXE c:\wintools
        copy a:*.WRI c:\wintools    or    copy b:*.WRI c:\wintools
        copy a:*.DOC c:\wintools    or    copy b:*.DOC c:\wintools
```

3. Copy all PIF Files to the Windows Directory.

```
        copy a:*.PIF c:\windows    or    copy b:*.PIF c:\windows
```

  Make sure you have a copy of the Visual BASIC VBRUN100.DLL file in the Windows
Directory.

4. Start Windows (if it is not already running), and using Program Manager, create a Group
called WinTools.

```
        [File][New...][Program Group][OK]
```

5. Now add all the WinTools programs to the WinTools Group.

        [File][New...][Program Item][Browse][WinTools][(each program)]

Consult your Windows User's Manual for further information on Program Manager, and how to create program groups and add items.

PIF

If you are already using PKUNZIP/PKZIP/LHARC, and would like to keep them in their current directory location, you will have to modify the "Program Filename" line in each respective PIF file for the WinZIP and Konan programs to work. See your Windows User's manual on PIF Files for information on how to edit with PIF Editor.

NOTES

· Each of the WinTools programs has its own individual Icon, representing each program.
· To use any of the WinTools, simply double-click on its Icon in the WinTools Group.
· To get instant help on any WinTools program, press F1 or select Help from the program's Help Menu.
· Please note that there is no Help included with WinQuote and the MetriCalc program (if you actually need help just to use a calculator, what are you doing with a computer!). All other WinTools programs include a complete "Hyper-Link" Help system.

Registration Bonus

Registration of WinTools entitles you to a Bonus disk of over 100 Windows Icons, and additional WinTools programs, bringing the total number of utilities to well over a dozen. *At the $30 registration fee, that's less than $2 per utility! Try to beat that price anywhere else.*
Please note that some of the Bonus Icons are ideas from other sources (Shareware Icons, or retail packages), that have been re-drawn to have a more pleasing look.

The following is a description of each of the Bonus disk programs.

· Icons   Assorted icons for all occasions.

· DiskLabel   Create Labels for 3.5" and 5.25" diskettes, using Avery   2+3/4"
                     x 1+15/16" or 3+1/2" x 15/16" computer labels. Use multiple Fonts,
                     Sizes, Bold, Italic, Underline, and draw Lines or Boxes.

· ICBM   Icon/Bitmap/Meta-file viewer. Display graphics files   for
                     easy identification. Browse your drives to see what
                     BMP and Icon files you have. Includes over a dozen example
                     ICO/BMP/WMF files.

· Konan   Archive multiple files on your hard drive to recover
                     more space. *Great for those of you with only 20MB thru
                     60MB drives!*
                     Are you taking up precious hard drive space to store all
                     of the Graphics, Desktop Publishing Art, CAD drawings,
                     Text or documents, you use at various times when you are
                     computing. You need a utility that allows you to Library
                     them together into individual Libraries.
                     Konan allows you to create a Library, consisting of a
                     Control File and an Archive file. The Control File holds
                     a listing of each file in the Archive, with complete user
                     entered description.
                     Simply Create your Library, giving it a name. Then Add
                     Files to it. When you need to use a file, simply select
                     the destination drive and directory and Extract.
                     Full Library Search, for ease in locating Key-Words you
                     placed in the program description area.
                     On average you can recover 50% or more of the space taken
                     up by DWG/DXF/PCX/TIF/TXT/DOC even COM and EXE files.

2
        WinTools

· SetFont   Do you need to change HP Laserjet Internal Default Fonts
                     on the fly? Are you tired of always having to go to the
                     Laser and change the settings from the front panel? Use
                     SetFont to simply click on the Font you wish to use.

· WinAbout   Displays a Dialog Box with the WinTools Logo.

· WinLink   Would you like to replace some of those terribly hard to
                     remember Menu keystrokes in programs such as Word with
                     simple Mouse clicks? WinLink lets you simply and easily
                     create a mouse "Icon-Bar" which you can easily click on
                     to make your selection.
                     Supports multiple files, multiple programs, user-
                     definable Icons. Send-Keys to any Windows Application,
                     or Run (Start-up) any Windows or DOS Application with
                     the click of a mouse.

· WinQuote   Display a different and unique Quote each time you turn
                     on your computer, or use it when you need some
                     inspiration. Add it to your "run=" line in the WIN.INI
                     file to have it automatically generate a new quote every
                     day.

· WinTables   Displays handy tables of Windows Keystrokes, and Extended ANSI
                     codes.

        WinTools

· WinView   Display the Hex and ANSI of any file. View entire file contents
                     including COM, EXE, and other Binary files. Find the absolute
                     locations of any Hex byte or text string.

Registration

REGISTRATION !! Please Read This !!

Registration of programs from David R. Green grants you the following
features:

1. A Registered Program Disk, with your name as Licensee instead of
   "Non-Registered Copy" text, as displayed in the program (applies to
   certain programs only).

2. A printed Owner's Manual (applies to certain programs only. See
   program descriptions above.).

3. Certain programs have a Bonus disk available, which will be sent First
   Class mail as soon as the paid Registration is received. Bonus disks
   contain additional accessories or files for the program, possibly
   developed after the initial release of the program.

4. Program support for 1 full year from the registration date. If you
   apply for support after the year is over, you will be charged a fee
   for whatever remedy is required, ie re-compiling, telephone charges,
   postage, etc. If you apply for support on an old version of any
   program, you will be asked to purchase the upgraded version or revision
   (at the 25% or 50% discount rate of course) since the new version or
   revision would probably have the bug fixed already.

   Support refers to:

   A. Program problem on particular Hardware, ie won't work properly on a
      certain Video card or with a particular Mouse.

   B. Loss of one or more of the program's files due to accident or media
      failure. A replacement disk(s) will be issued for the cost of the
      disk(s), duplication time, and shipping.

   C. Questions concerning Program Operation, perhaps with particular
      hardware, or when adding a new peripheral.

   D. Problems getting the program to work on certain hardware, PRIOR to
      registration, ASSUMING YOU DESIRE TO REGISTER WHEN THE BUG IS FIXED.

5. All Registered users will receive Shareware Distributed Version
   upgrades for a reduced fee. Minor upgrades are only 25%, and Major
   upgrades are only 50%, of their regular Registration Fee. For example,
   if you registered PROGRAM1 version 1.0, when version 1.1 becomes
   available you will only pay $10 to register assuming version 1.1 has a
   Registration fee of $40. Registration of version 2.0 would likewise be
   $20. Anyone registering a new version, who has not registered a
   previous version will of course pay the full amount. You already paid
   for the License to use the program with the first Registration, you
   shouldn't have to pay full pop again.

6. Registered users will receive free newsletters detailing what's new for
   programs and versions. This service is also valid for overseas parties,
   so please give your correct address.

Registration of these programs does not fund a faceless corporation that
is already excessively wealthy; writing programs is how I make my living
and feed my family. I am trying to provide Retail-or-better quality
programs at low Shareware prices, using volume sales instead of high

prices. I am currently not allowing registration by credit card, due to
the fact that I would have to increase my prices to cover the cost of the
credit card fees (VISA would charge me 3-4% on each sale). If you wouldn't
mind paying a little more, and would like the ease of credit card payment,
please indicate this on the Registration form or Order form. If enough
people want it, I'll do it. I can not be held responsible for delays or
loss of Order or Registration forms in our mail system (we all know how
fast they are!), but if you have any questions or problems, please contact
me, I need your business, and am here to help.
