Contents

Welcome to **Currency Exchanger 3.3**.   This program allows you to exchange money from one currency into another.   The shareware version of this program supports 16 currencies while the registered version supports 199 currencies from all around the world.

The topics of this help file are:

How to register

To register this program you will have to fill out the registration form which is in the file "ORDERFRM.TXT" located in the same directory with this program.   The registration price for each copy of this program is: $15.00 Canadian.   Make checks or money orders payable to: Cosmin Smeu.   Allow three to seven weeks for delivery.   Please complete and mail the registration order form along with the check (or money order) to:

Cosmin Smeu
2020 Jasmine Cr. #610
Gloucester, Ontario
Canada
K1J-8K5

NOTE: The shipping and handling cost of the program is included in the price.

For more information on the registration benefits of this program read the Registration benefits help text.

Registration benefits

There are lots of benefits for you if you register this program.   Some of them are:

1. The registered version supports 199 countries and over 70 cities in'Worrld Clock' as opposed to 16 countries and 16 cities in 'World Clock' supported by the shareware version of this program.

2. The registered version has a reset option which allows you to reset all the exchange rates to their default values.   This option is very useful if you screw up the exchange rates and want to reset their values.

3. The registered version has access to the options dialog box where you can set different options of this program.   Options include the number of decimal points the resulting currency will be displayed at.   The shareware version can only show this to 2 decimal places.

4. The registered version supports the user interface in 3 languages (English, French, and Romanian).

5. The registered version has a complete help file with help to every menu command and every dialog box.

NOTE: The previous characteristics apply to version 3.3 for Windows of this program.

For more information on how to register this program read the help text: How to register this program. available from the Help menu.

Licence agreement for the shareware version

This version of the program is distributed as shareware.   A try before you buy concept.   You are allowed to try this program for a maximum period of 30 days, after which you have to register it or stop using it.

As this version is distributed as shareware you can distribute it as long as you don't charge any amount of money for it (except for duplication and media cost), and you supply all the files composing this program in their original unmodified form.

Program history

Version 3.3 - *released: May 1, 1997*
- Main Window has been enhanced with buttons and a status bar.
- A bug with the shareware version was fixed.
- World Clock now has over 70 cities from around the world, in the registered version only.

Version 3.2 - *released: February 27, 1997*
- All flags were drawn in the list boxes
- Even more compact and optimized code.

Version 3.1: - *released: December 26, 1996*
- World Clock applet was added.
- Interest calculator was remodelled.
- More flags were drawn.
- Code has been optimized for faster speed and smaller size.

Version 3.0: - *released: July 5, 1996*
- 125 currencies have been added, to a total of 199 currencies supported.
- The menu bar and most dialog boxes have been redesigned.
- The "Reset" button in the "Set exchange rates" dialog box has a bitmap on.
- The program now displays an intro screen (registered version only).
- The "Set exchange rates" dialog box can now support two different equations for setting the exchange rates.
- The help file is now a WinHelp file.
- Fixed a bug when loading a language DLL file.
- The installation program has been recreated entirely and now it is a full Windows program capable of creating Program Manager groups.
- The list boxes containing the countries & currency names, now contain flags to make it easier for the user to select a currency.

Version 2.0: - *released: November 28, 1995*
- The default exchange rates have been updated.
- The menu bar and a few dialog boxes have been redesigned.
- The user interface now supports the Romanian language.
- The Edit boxes have been modified to allow only numerical input.   This decreases dramatically the chances of making any typing mistakes.
- A small program: "Interest Calculator" has been incorporated in the main program.   This program allows you to calculate the interest on any amount of money.   The program also has lots of options to calculate different types of interest.
- A small bug has been fixed in the "Options" dialog box with the user interface radio buttons.

- A DOS installation program has been   made to help you install the program easier (registered version only).
- 11 more currencies have been added, to a total of 74 currencies supported.

Version 1.0: - *released: November 1, 1995*
- First version, basic program.
