## **-Directory Checker™- version 1.2.0**

A POWERFUL WINDOWS TOOL

**FREE DEMO**

Register your copy for **ONLY 29 US \$**

### **The -Directory Checker™-**

The Directory Checker™ is powerful tool for comparing and storing states of disk or directory contents, files. Uses CRC when compares files in different time zone. The Directory Checker™ scans automatically all subdirectories, calculates CRC where the timestamp of the file can not be used, and can save scans of directories for future comparison. Storing Master files with CRC encoded, enables the detection of any byte changed in any file. So the Directory Checker™ can be also used as an early virus detector. A small program with great performances, powered with ADS32. A fully operational demo, which can easily be turned into a licensed software by receiving your personal key code.

### **Requirement :**

Windows 95, Windows NT 3.51, Windows NT 4.0
