

Level 1: Check the first booth.
Look for a bookcase.

Level 2: Defile the evil symbol behind the alter, then check the beginning. (Blast it!)

Level 3: Check a hard to get place, then search the secret room.
If the second secret room is found and you go though every bit of it a third room will open near the beginning.

Level 4: If the misaligned texture and the pop-up platform doesn't give it away then maybe you should try something easier like tic-tac-toe.

Level 5: Check for an out of place feature, a secret is nearby. Both are marked by an Identical feature. **I** know you can handle that.

Level 6: The secret leads to the end and the real fight. Check the major feature of the Throne room.
