Grab It!

Datatrend Software

Instructions for use:

This is a demo version of Grab It!

(Demo users start at step 3)

Load It!

1. Click on "Load Picture" to load in a scanned/downloaded graph.

- Types of files accepted are gif, jpeg, bitmap, metafile, and icon (gif, jpg, bmp, dib, v

- Tiff files (and others) cannot be imported, they are not supported by Excel for Activ

(Click the Datatrend Software logo above for links to utilities that can convert your picture to a compatible format)

- If the picture you have loaded is larger than your screen you must adjust your view

Tell It!

2. Be sure that the proper axis definitions are selected at the left hand side of the screen (linear,

- Axis definitions (A6-A15) effect the data you input, Axis outputs (A18-A23) effect

3. Follow the instructions in cell B1 to define the graph ranges.

4. Input the graph ranges that were clicked on. Common "Input Formats" tabbed below.

Grab It!

5. Click directly on your data points.

- The data appears in real time starting in column C.

- For multiple data sets, choose "next data set", then continue to select data points.

6. Your data can be copied to another application or worksheet by highlighting it and choosing t

7. Data can then be cleared (clear data button) and a new picture loaded.

size, select the View menu, then zoom.

log, date or time, scaled).
 the final format of the results.

the edit menu, followed by copy (or ctrl-c) and paste (ctrl-v).

tability on any particular computer system. Use at your own risk!

When Grab It!™ asks for number, time and date inputs, these are the acceptable formats that can be used.

(there are others that work fine also, feel free to experiment with your specific case)

Acceptable Numbers	Example	Equivalent
##.##	1900.7	1900.7
#.##E#	1.900E3	1900

Acceptable Dates	Example	Equivalent
mm/dd/yy	7/31/97	July, 31 1997
mm/dd/yyyy	7/31/1997	July, 31 1997
mm/yy	7/97	July, 1 1997
mmm-yy	Jul-97	July, 1 1997
mmmm yy	July 97	July, 1 1997
dd-mmm-yy	31-Jul-97	July, 31 1997

There are MANY more date formats that work.

Note: If a "day" is not entered, the first day of the month or year chosen will be assumed.

Acceptable Times	Example	Equivalent
hh a/p	10 a	10:00 AM
hh am/pm	10 am	10:00 AM
hh:mm	10:05	10:05 AM
hh:mm	14:05	2:05 PM
hh:mm:ss	10:05:30	10:05:30 AM

All time outputs are formatted as 24 hr times to avoid confusion

NOT Acceptable Times		
mm:ss	10:05	This will be interpreted as hh:mm
hh	10	This will be interpreted as a date,
ss	65	If your x-axis is seconds, minutes

format
not a time, you must put a or p
, hours use a linear/log x-axis

GRAB IT! ORDER FORM
