What does this program ?

Use this software to convert ANSI-Strings to HTML-Code or CHR-Number code to ANSI-Strings.

This directions are possible:

ANSI strings >
          HTML code
          CHR Number
          Description

HTML code >
          ANSI strings
          CHR Number
          Description

CHR Number >
          HTML code
          ANSI strings
          Description

ANSI strings >   by clicking on symbol. (Only in full-version)
          HTML code
          CHR Number
          Description

Write the number or the string in edit field and click on one of the three convert buttons, or click on Search for get a list of all strings and choose one by clicking on it.

At this time the description of the strings are written in german language. Write me to ask for a list of these strings. You will get them by eMail, so you can convert these strings. Send them back and the program will be updated.
