

Upgrade Error

You are attempting to install a FaxNow! evaluation over an existing, fully licensed version of SHORT_PRODUCT_NAME. In order to install the evaluation copy you must either, 1) un-install the existing copy of FaxNow! or 2) install the evaluation on another machine.

Inadequate user license

You are attempting to install a version of FaxNow! that is licensed for fewer user's than your existing FaxNow! installation has defined. Before installing this version of FaxNow!, you must reduce the number of existing FaxNow! user's defined, to the same level as the FaxNow! version you are attempting to install. Use the FaxNow! User Admin program to remove or amend users.

If you require a larger user license for your FaxNow! software, contact your software supplier or call RedRock Technologies for your nearest FaxNow! reseller.

Blacklisted Serial Number

You have attempted to use a blacklisted serial number to license this FaxNow! software. Please contact RedRock Technologies directly to obtain a new serial number. RedRock Technologies can be contacted at **Error! Reference source not found.** or by fax on +44 (0)1908 354220.

Downgrade

You are attempting to install a version of FaxNow! that is licensed for fewer user's (or lines) than your existing FaxNow! installation. If you continue with this installation, your FaxNow! software license will be reduced to the license level of the new installation.

If you require a larger user license for your FaxNow! software, contact your software supplier or call RedRock Technologies Technologies for your nearest FaxNow! reseller.

Installation of a Personal version over a network version

You have attempted to install a personal version of SHORT_PRODUCED_NAME over an existing network client or server. This upgrade is not supported. In order to install a personal version onto a machine with network components installed the network components must be uninstalled first.
