Chapter 1

Recall

1.1   Documentation for Alert

This document describes the usage of Alert.

About

Description

Usage

Versions

Afterwords

This program is Public Domain

1.2   About Alert

PROGRAM: Alert

VERSION: V1.1

AUTHOR: Ketil Hunn, Norway

COPYRIGHT: 1993 Ketil Hunn

TOOL: SAS/C V6.3

REQUIREMENTS: Any Amiga with Kickstart 33 or above.

SOURCE: The included source can be compiled with SAS/C V6.0+.

1.3   Description

Nothing much to say about this program really. It's a small command to

display text in a standard RECOVERY_ALERT. The alert will appear yellow

under WB2.0+ and red under previous kickstarts.

1.4   Usage

Syntax: Alert TEXTLINE/M

All given parameters will be centred horizontally and its frame will

automatically adjust to the number of lines.

Typing just 'Alert' or 'Alert ?' will display the copyright and the

template.

As an example, 'Alert "Line number 1" Line_2 Line_3 "The last line!"'

will be displayed as:

****

* Line number 1 *

* Line_2 *

* Line_3 *

* The last line! *

****

1.5   Versions

29.May.93 V1.0 Initial release

07.Nov.93 V1.1 Fixed two bugs which caused Enforcer hits.

1.6   Afterwords

Send e-mail, bug-reports, comments, suggestions, postcards etc. to:

Between 15th of August and 5th of June (every year) I will be available at

the following address:

Ketil Hunn

Fabrikkveien 4-8 / Leil 107C

N-6400 Molde

NORWAY

or by e-mail:

hunn@dhmolde.no

In the summertime however, I will be available at the following address

and only by ordinary mail:

Ketil Hunn

Nabbetorpveien 35B

N-1632 Gamle Fredrikstad

NORWAY

no e-mail

******************************** NOTE *********************************

It is extremely important that you state which version of the program

you use and what your system-configuration is. This will make it easier

for me to locate bugs and problems...

******************************** NOTE *********************************

Enjoy!

Ketil Hunn

Molde, October 1993
