SHAREWARE

This program is distributed under the Shareware concept. You may use this program for a period not to exceed 30 days, at which time you are expected to register it with the authors. If you choose not to register, you **MUST** discontinue use of the program.

By registering, you support the continued development of this and other programs to come.

Please feel free to make copies of this program in unmodified form only. All bitmaps must be included with the program in unmodified form and may not be used or distributed separately. This program may not be distributed along with or in connection with any other program, commercial, Shareware, or otherwise without the express written consent of the authors.

WHAT IS SHAREWARE?

When you buy a commercial software program, you are not just paying for the program. You are also paying for packaging, shrink-wrap, pre-printed manuals, marketing, advertising, and distribution. When you buy a commercial program, you normally have to accept the program sight unseen, and cannot return a program if it is not what you need.

With Shareware programs, you are not paying for the packaging, advertising, etc., that you do with commercial programs. Nor do you have to cover the costs of stocking stores and big display racks. You have the privilege of obtaining software for a very nominal fee (covering the cost of diskette and copying), and trying out the program for a period of time, before actually paying the full cost of the program itself. When you obtain a Shareware program, you may use the program free of charge for a reasonable period of time, after which you are expected to 1) send payment directly to the author of the program, or 2) discontinue use of the program.

Shareware programs are copyrighted, full-featured programs comparable to commercial programs. The authors have spent many hundreds or thousands of hours writing and perfecting their programs. Most of the larger programs are

continually being updated with new features being added.

Shareware vendors:

Feel free to distribute this program, in unmodified form only. You may add "help" files along with the program as long as the original files remain unmodified. You must clearly state that the program is distributed as Shareware and that your fee is for the disk, handling, and copying ONLY, and that a payment to the author is required for continued use. Fee not to exceed \$7.00. Contact us for the newest version.

WARRANTY

Design-A-Room is supplied "AS IS." The authors make NO warranties, either expressed or implied, including, but not limited to, fitness for particular purpose. The authors assume no liability for damages, direct or indirect, from the use of ***Design-A-Room***. The user assumes full responsibility for the use of this program.

INTRODUCTION

Design-A-Room was designed to take full advantage of the benefits of Microsoft Windows. Practically everything that you do in ***Design-A-Room*** you do with a click of a mouse - no typing in commands - no trying to remember strange key commands in order to do everything. About the only time you will need the keyboard is to type in the name of your room!

Design-A-Room lets you draw a room, put all the furniture in it, in exactly the right dimensions, and then move the pieces around to your heart's content-- without ever getting up from your chair!

Put walls wherever you want-- move them, resize them, make any shape and size room up to 34 x 23 feet. Put several rooms together on the same page - or put the same room on twice to see what different arrangements look like.

Design-A-Room comes loaded with 17 different wall, doors, fixtures, etc., plus 31 different furniture pieces. Couches, pianos, tables, even a pool table and fireplace.! All professionally drawn so that you know exactly what you are looking at when you view the room. You can re-size each piece to the nearest inch, so you can design your room to your exact dimentions.

The "Snap-to-Grid" option lets you quickly put your furniture and fixtures in the room. Then turn off "Snap-to-Grid" to let you arrange the pieces precisely where you want them. "Snap-to-Grid" also makes putting walls up a "snap."

Design-A-Room shows you the exact sizes of your furniture pieces, and also the exact location of each piece in the room to the nearest inch. No guessing necessary!

When you are finished with your room, you can save it to disk and print it out on any Windows 3.1 supported printer.

With ***Design-A-Room*** you know what your room will look like BEFORE you spend all your time and energy moving heavy pieces of furniture around!

Design-A-Room comes with the following files:

SETUP.EXE - Installation program
DARSETUP.EXE - Design-A-Room Setup
DESIGN.EXE - Main program
DESIGN.INI - Configuration file
DESIGN.WRI - This file
README.TXT - Getting started information
REGISTER.TXT - Registration form
VBRUN300.DLL - Visual Basic DLL
COMMDLG.DLL - Visual Basic DLL
CMDIALOG.VBX - Visual Basic file
*.BMP - Furniture and Fixture Icons (48 files)

To start a room:

Measure the actual walls and furniture pieces of the room you want to design. This is the most critical step. The more accurate your dimensions are, the more accurate your final room will be.

When measuring, measure the length and the width, looking down from the top. When measuring odd-sized pieces, such as a grand piano, or a round table, measure the longest dimensions each way.

Start with the top wall. Click the left mouse button on the left/right wall icon to put it in the room. Click the left mouse button in the upper left-hand-corner of the wall, hold it down, and move it close to the left-hand-side of the room. Let go of the mouse button. Then, by clicking the left mouse button just to the right of the icon, and holding the mouse mouse button down, "drag" the end on the wall icon to the right, watching the bottom of the screen until you get to the correct length. Then let go of the mouse button. Click the mouse on the upper left-hand-corner of the wall, hold the button down, and move the piece exactly into place into place. The numbers at the bottom of the screen will show the exact position of the mouse cursor.

Repeat the above steps to add other walls, doors, windows, and other fixtures.

To place furniture in the room:

After you have the fixtures place, add all of your furniture following the same procedure as above. After a piece is in place, it can be easily moved to another location by dragging it by the top left corner, or re-sized by dragging just outside the icon.

To move a piece of furniture already in the room:

The mouse only affects one piece of furniture at a time. To choose another piece of furniture already in the room, click on that piece with the **RIGHT** mouse button. Then you can move it to the new location by dragging the top left corner.

To re-size a piece of furniture:

Click on the piece of furniture with the **RIGHT** mouse button. Then, placing mouse cursor just outside the furniture box, and holding a button down, move until desired size is achieved.

To duplicate a piece of re-sized furniture already in the room:

Click on the piece of furniture with the **RIGHT** mouse button to select it. Go to the "Edit" menu and choose "Copy." Then choose "Paste." A duplicate of the piece of furniture will appear at the

top corner of the room. Click on this piece with the **RIGHT** mouse button, and then move or resize it as necessary.

To turn "Snap-to-Grid" on or off:

Go to "Options" menu, and click on "Snap to Grid." This will turn "Snap-to-Grid" off. Clicking on it again turns it on.

To save a finished room:

Go to "File" menu and choose "Save" or "Save As." "Save" will save the current room with the current filename. "Save As" will let you save the file under a different name.

Design-A-Room automatically adds the extension "ROM" to all saved room files.

To load a previously made room:

Click on the "File" menu. Choose "Open." Click on the the desired file, and then click on "OK."

To start a new room:

Click on the "File menu. Choose "New."

To exit the program:

From the "File" menu, choose "Exit."

To print the room:

From the "File" menu, choose "Print."

REGISTRATION

When you register this program, you will receive 1) the newest version of ***Design-A-Room*** without the Shareware Screen, 2) a free update to the next released version, and 3) a 1 month free membership on the Epsilon Computing Board (513) 563-6475.

IN ADDITION - the registered version of Design-A-Room comes with several enhancements, including a third, customizable tool bar, to enable you to design your own furniture pieces, and "automatic wall creation" to save time putting up walls.

To register, either call (513) 563-4871 with your Visa or MasterCard handy, or print out REGISTER.TXT and mail it along with \$29.95 (+ 1.65 tax if in the state of Ohio) to:

Epsilon Computing
1668 Trillium Court
Cincinnati, OH 45215

You can also register online by calling The Epsilon Computing Board at (513) 563-6475 (2400-38400 BPS/HST/V.32bis) anytime with you Visa or Mastercard number handy.

We can be reached for questions, comments, etc.

at the above address
