## • Shareware: \$15

◇ This program is distributed as **shareware** and costs **\$15**. If you use it, please save a copy of the **Register** utility with the button below and launch it. Enter your name, your email address (if available), and the number of licenses you wish to purchase. Save, copy or print the data from the Register application and send it to Kagi along with your payment. Kagi will process your registration and forward your payment to us. If you're on the Internet, an online registration site is also available at the above URL.

◇ Your personal **registration** for Niji will be sent back to you as quickly as possible when you register. If you have no email address you should select the **postcard receipt** option in the Register application, so that Kagi can send you back your registration code. Kagi transmits the registration codes via email and paid postcard receipt only.

◇ **Please register**: your support is the only way for us to keep working on cool shareware programs.

## • Kagi registrations

◇ Payments sent via **email** and through the **online registration** site are processed within 3 to 4 days. You will receive an email acknowledgement when your registration is done. Payments sent via **fax** take up to 10 days. You will also be notified by email if you provide a correct internet email address. Payments sent via **postal mail** take time to reach Kagi and then up to 10 days for processing. Again, if you include a correct email address, you will hear from Kagi when the form is processed.

◇ If you pay with a **credit card** or **First Virtual**, you can email or fax the data to Kagi. Their email address is <sales@kagi.com> and their fax number is +1-510-652-6589. You can either copy the data from Register and paste it into the body of an email message, or you can save the data to a file and attach the file to an email message. There is no need to compress the data file, it's already pretty small. If you have a fax modem, just print the data to the Kagi fax number.

◇ You can also pay with a wide variety of **cash** from different countries, or with a **check** drawn in US Dollars. Kagi cannot accept checks in other currencies. In both cases you should print the data using the Register application and send it to the address shown on the form, which is:

Kagi  
1442-A Walnut Street #392-HL  
Berkeley, California 94709-1405  
U.S.A.

◇ If you have a **purchasing department**, you can enter all the data into the Register program and then

select **Invoice** as your payment method. Print three copies of the form and send it to your accounts payable people. You may want to highlight the line that reminds them to include a copy of the form with their payment.

◇ Kagi cannot invoice your company. If you need an invoice, you must act on our behalf and generate the invoice and handle all the paperwork on your end.

◇ Please do not fax or email payment forms that indicate cash, check or invoice as the payment method. As far as we know, there is still no technology to transfer physical objects via fax or email and without the payment, the form cannot be processed.

## • Distribution

◇ This software is ©1997 **Objective Software**. It can be freely distributed as long as it is not modified and there's no charge for it, but it may not be included in any commercial package without our consent.

◇ All **online services** and **bulletin boards** may make it available to their users at no charge other than the normal connection fees.

◇ All non-profit **user groups** may distribute it at no charge.

◇ All **magazines** may publish it on **floppy disk** or **CD-ROM** without asking us first, as long as we get a copy of the issue containing the software.

◇ All **CD-ROM shareware collections** and **CD-ROM magazines** may include it without our prior consent, as long as we get either a copy of the CD-ROM or an offer to buy the CD-ROM at a discounted price.

◇ All **redistribution companies** such as Pacific HiTech, AMUG, Celestin or Educorp may distribute it, as long as we get a copy of each media containing the software and a catalog of the company's offerings (where applicable).

## • Disclaimer

◇ This software should never cause any damage, but you're using it at your own risk. As independent software developers, we can make **no warranties** whatsoever on it.
