Compendium Deluxe #1 Directory Utilities Menu

1.1 Directory Utilities

Filename	Comands	Size	Description
abkdir30.lha	VX	84K	ABC Directory 3.0 by Marc Dionne - This is a versatile and easy to use dir util. It goes into LHA archives, it makes good use of file comments, it has definable filetypes, it's quick, it has a shell, it slices and it dices!
afcp3526.lha	VX	121K	AFCopy V3.526 by Hydra of LSD - This is a File manager on the same vein of Opus, check it out!
brow241.lha	VX	217K	BrowserII 2.41 by Sylvain Rougier and Pierre Carrette - This works like workbench. To copy files, you just have to select them and to drag them over the destination directory. It's power is far from other file manager tools which are able to display only two directories, and are full of gadgets which clutter up more than half of the screen.
dop2adp1.lha	VX	15K	DOPUS-2-ADPRO 1.0 by Conny Ankargren - These scripts were written to help convert a big amount of files using Art Department Pro. This would take extremly long time if I had to load every picture manually, make the right configurations and then save the new picture, so instead I wrote these scripts called: PICTURE-2-IFF and GIF<>JPG.
dopuslha.lha	VX	24K	DOPusLhARexx by Geoff Seeley - DOPusLhARexx is a set of ARexx scripts for Directory Opus that will allow you to view LhA archive files in a DOpus window and extract/delete/ add one or more files to/from the archive.
dopussup.lha	VX	40K	Dopus_GPFax and Dopus_Module-Sup by Jean VH These are two Opus tools for modem users, the docs are in French and as I am not a Opus user, I can't check them out.

exapp1.lha VX 46K ExApp 1.0 29/10/93 by Dominic Clifton -
 This is a small program that will start up
 other applications when different types of
 files are dropped onto it's appicon. For
 example so you configured exapp to
 recognise all .TXT file as being text.
 When you drop a .TXT file onto it it will
 load up your text viewer/editor.

filer311.lha VX 217K Filer 3.11 by Matthias Scheler - This is
 an Intuition controlled file manager.

lhadir13.lha VX 11K LhADir.dopus 1.3 by Edmund Vermeulen -
 This is an ARexx script for Directory Opus
 that allows you to show the contents of
 an LhA archive file in a window and
 operate on the files and directories
 inside the archive.

mtool15.lha VX 193K MultiTool II 1.5 by Boris Jakubaschk -
 MTool provides the features and
 flexibility of the shell with the comfort
 you know from using workbench. You can
 perform all actions by mouse, including
 copying, moving and deleting files,
 displaying pictures, editing text, etc.
